Stranding Network

Saturday, July 17

12:00 – 12:45

Admission: FREE

**Highline Community College
MaST Center**

Located near the Redondo Beach Park
<http://www.highline.edu/mast>

Summertime is pupping season in the Puget Sound and harbor seal pups may show up on local beaches to rest. Come learn what to do when a seal lands on your beach and what local researchers do in response!

Featuring a slideshow of the birth and life history of the harbor seal (*Phoca vitulina*) – our most abundant marine mammal in Washington State. Come explore hands-on other common marine mammals in our area with a look at real skulls, bones, and whale baleen.
